RAM specifics Does anyone know what the specs are for the best compatible RAM for the 2.. They are both were reliable brands Purchased 2x8gb crucial major faults started within days repair by Apple techs took time, and by the time both had been replaced beyond 45 days.. You can buy RAM that is the right speed (eg 667 Mhz DDR2 FB-DIMM etc) but it still won't work.. I've been dealing with Crucial, without issues, for 15+ years I recently bought some memory for my Mac Mini and it is not very heat tolerant.. In case you haven't yet realised, Apple Memory is different to normal PC RAM, so if you go to a cheap PC shop or ebay and buy some memory it probably won't work in your Apple computer.

Pathetic customer service Stay away from Crucial brand pay the couple of extra \$ and get real quality.. The other place I'd suggest to buy RAM from is Last month I was upgraded my RAM and SSD in my new macbook pro and I ordered the RAM from OWC and the SSD from Crucial.. Here's a reliable place I have found to buy RAM that works well in your Macintosh.. Save On RAM For Your 2011 iMac! Lifetime Warranty Trade-In Rebates Free Shipping Memory.. It's not that you need ‘Apple’ memory, but you do need high quality RAM with certain specifications that are not obvious so you need to buy from someone who knows the differences.. It took me a while to figure out why my Mac was crashing multiple times per day I finally took the Crucial memory out and put the original Apple memory back in (4GB – Ugh).. If you can recommend a good reliable MAC RAM supplier leave the details in a comment below! After much trial I have found a very reliable source of Mac RAM to

be ‘Crucial’. cea114251b [Dora Ps3 Games](#)
